CAPABILITY STATEMENT

Civil Logistics provides disaster assistance, response, recovery and mitigation support nationally, and cross mission support internationally, assisting government organizations, agencies, municipalities, and commercial business in contingencies across a wide range of emergency, humanitarian, or civil operations. Comprised of trained and fully vetted contractors and former military service members disciplined in engineering, logistics, and government consulting, our personnel have the real world experience to execute complex assignments involving infrastructure, management and surge capacity.

Debris Management/Remediation

The Differentiator for Civil Logistics:

We are a dedicated SDVOSB able to directly trace its roots back to associations formed on the battlefield during Operation Desert Storm during the 1991 campaign. From those initial beginnings, we now have a distributed workforce of professional and technical experts managed from the same core group of founders. We understand mission accomplishment and what it takes to achieve objectives.

Strengthened by our existing strategic alliances, we provide consulting services to business, municipalities, and government agencies with recovery, damage assessment, project formulation, grant programs, and hazard mitigation.
